Site Server 3.0 Personalization and Membership

Robert Howard

Site Server 3.0 Personalization and Membership Robert Howard
This book focuses on the Personalization and Membership capabilities of Site Server 3.0, which enable you to do clever things like this: ISP - Use Personalization and Membership to personalize IIS administrative tool using the existing IIS web administration interface, to allow different members to have different administrative privileges; also, to implement user membership on various levels to provide simple display and access privileges as well as integrating with existing applications. Interactive Web Site - Use Personalization and Membership to control the display of the content on a site, thus giving end-users a richer browsing experience. This example theme demonstrates how to incorporate lightweight samples and ideas into their existing web site. Intranet - Use Personalization and Membership in an Intranet site to control access to items on the network. This would be a higher end example of the type of things that Personalization and Membership can do.
