Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) Henning Wachsmuth

This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run-time efficiency and that robustly mine relevant information from text of any kind. Based on state-of-the-art techniques from machine learning and other areas of artificial intelligence, novel pipeline construction and execution algorithms are developed and implemented in prototypical software. Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad-hoc use of text mining in web search and big data analytics.

Both web search and big data analytics aim to fulfill peoples' needs for information in an adhoc manner. The information sought for is often hidden in large amounts of natural language text. Instead of simply returning links to potentially relevant texts, leading search and analytics engines have started to directly mine relevant information from the texts. To this end, they execute text analysis pipelines that may consist of several complex information-extraction and text-classification stages. Due to practical requirements of efficiency and robustness, however, the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple, manually constructed pipelines.

From reader reviews:

Vernie Ruiz:

This book untitled Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) to be one of several books which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retailer or you can order it via online. The publisher of this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Mobile phone. So there is no reason for you to past this guide from your list.

Errol Sawyer:

Reading a book can be one of a lot of action that everyone in the world enjoys. Do you like reading book consequently. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new information. When you read a book you will get new information since book is one of numerous ways to share the information or their idea. Second, reading through a book will make a person more imaginative. When you examining a book especially tale fantasy book the author will bring you to definitely imagine the story how the figures do it anything. Third, you can share your knowledge to other people. When you read this Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science), it is possible to tells your family, friends along with soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

Bertha Underwood:

A lot of people always spent their free time to vacation or even go to the outside with them household or their friend. Were you aware? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you want to try to find a new activity that's look different you can read any book. It is really fun in your case. If you enjoy the book that you read you can spent all day every day to reading a e-book. The book Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) it is extremely good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. Should you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not to fund but this book has high quality.

Robin Harvey:

A lot of book has printed but it is different. You can get it by net on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever through searching from it. It is called of book Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science). You can add your knowledge by it. Without making the printed book, it could possibly add your knowledge and make a person happier to read. It is most significant that, you must aware about guide. It can bring you

from one location to other place.
