Differential Equations with Mathematica, Fourth Edition

Martha L. Abell, James P. Braselton

Differential Equations with Mathematica, Fourth Edition Martha L. Abell, James P. Braselton

Differential Equations with Mathematica, Fourth Edition is a supplementing reference which uses the fundamental concepts of the popular platform to solve (analytically, numerically, and/or graphically) differential equations of interest to students, instructors, and scientists.

Mathematica's diversity makes it particularly well suited to performing calculations encountered when solving many ordinary and partial differential equations. In some cases, Mathematica's built-in functions can immediately solve a differential equation by providing an explicit, implicit, or numerical solution. In other cases, mathematica can be used to perform the calculations encountered when solving a differential equation.

Because one goal of elementary differential equations courses is to introduce students to basic methods and algorithms so that they gain proficiency in them, nearly every topic covered this book introduces basic commands, also including typical examples of their application. A study of differential equations relies on concepts from calculus and linear algebra, so this text also includes discussions of relevant commands useful in those areas. In many cases, seeing a solution graphically is most meaningful, so the book relies heavily on Mathematica's outstanding graphics capabilities.

- Demonstrates how to take advantage of the advanced features of Mathematica 10
- Introduces the fundamental theory of ordinary and partial differential equations using Mathematica to solve typical problems of interest to students, instructors, scientists, and practitioners in many fields
- Showcases practical applications and case studies drawn from biology, physics, and engineering

From reader reviews:

Jane Cuellar:

With other case, little folks like to read book Differential Equations with Mathematica, Fourth Edition. You can choose the best book if you love reading a book. As long as we know about how is important a new book Differential Equations with Mathematica, Fourth Edition. You can add expertise and of course you can around the world by way of a book. Absolutely right, mainly because from book you can learn everything! From your country till foreign or abroad you will find yourself known. About simple issue until wonderful thing you could know that. In this era, we can easily open a book or searching by internet gadget. It is called e-book. You can use it when you feel fed up to go to the library. Let's study.

Stewart Ramirez:

Your reading 6th sense will not betray a person, why because this Differential Equations with Mathematica, Fourth Edition e-book written by well-known writer we are excited for well how to make book that can be understand by anyone who have read the book. Written throughout good manner for you, still dripping wet every ideas and publishing skill only for eliminate your hunger then you still doubt Differential Equations with Mathematica, Fourth Edition as good book not just by the cover but also from the content. This is one publication that can break don't evaluate book by its handle, so do you still needing an additional sixth sense to pick this!? Oh come on your reading sixth sense already said so why you have to listening to yet another sixth sense.

Anna Sanders:

This Differential Equations with Mathematica, Fourth Edition is great reserve for you because the content that is certainly full of information for you who else always deal with world and still have to make decision every minute. This specific book reveal it details accurately using great plan word or we can claim no rambling sentences within it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but hard core information with lovely delivering sentences. Having Differential Equations with Mathematica, Fourth Edition in your hand like getting the world in your arm, facts in it is not ridiculous a single. We can say that no book that offer you world with ten or fifteen moment right but this publication already do that. So , this can be good reading book. Hey there Mr. and Mrs. stressful do you still doubt that?

Silvia Doucet:

That e-book can make you to feel relax. This book Differential Equations with Mathematica, Fourth Edition was bright colored and of course has pictures on there. As we know that book Differential Equations with Mathematica, Fourth Edition has many kinds or category. Start from kids until teens. For example Naruto or Detective Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you personally

and try to like reading that will.
