James E. Fowler, Sungkwang Mun, Eric W. Tramel

Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing) James E. Fowler, Sungkwang Mun, Eric W. Tramel

Block-Based Compressed Sensing of Images and Video overviews the emerging concept of compressed sensing (CS) with a particular focus on recent proposals for its use with a variety of imaging media, including still images, motion video, as well as multiview images and video. Throughout, it considers a variety of CS reconstruction techniques proposed in recent literature and examines relative performance of several prominent reconstruction algorithms for each of the various imagery formats. Particular emphasis is placed on block-based measurement and reconstruction which has the advantages of significantly reduced memory and computation with respect to other approaches relying on full-frame CS measurement operators. Block-Based Compressed Sensing of Images and Video employs extensive experimental comparisons to evaluate various prominent reconstruction algorithms for still-image, motion-video, and multiview scenarios in terms of both reconstruction quality as well as computational complexity. It is not intended to serve as an in-depth tutorial on the theory or mathematics of compressed sensing. The coverage of CS theory is brief, while the specifics of the application of block-based compressed sensing (BCS) to natural imagery consume the bulk of the discussion.

From reader reviews:

Willis Newby:

Your reading sixth sense will not betray you actually, why because this Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing) reserve written by well-known writer who really knows well how to make book which can be understand by anyone who read the book. Written within good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still question Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing) as good book not merely by the cover but also through the content. This is one guide that can break don't evaluate book by its protect, so do you still needing a different sixth sense to pick this!? Oh come on your reading through sixth sense already told you so why you have to listening to an additional sixth sense.

Frances Sitz:

This Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing) is great publication for you because the content which is full of information for you who also always deal with world and also have to make decision every minute. That book reveal it details accurately using great coordinate word or we can declare no rambling sentences included. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but hard core information with wonderful delivering sentences. Having Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing) in your hand like getting the world in your arm, information in it is not ridiculous 1. We can say that no publication that offer you world inside ten or fifteen moment right but this reserve already do that. So , it is good reading book. Heya Mr. and Mrs. stressful do you still doubt that will?

James Floyd:

In this era which is the greater person or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple approach to have that. What you are related is just spending your time almost no but quite enough to possess a look at some books. Among the books in the top checklist in your reading list is actually Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in Signal Processing). This book and that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking right up and review this guide you can get many advantages.

Amy Osburn:

A lot of e-book has printed but it takes a different approach. You can get it by net on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever by means of searching from it. It is called of book Block-Based Compressed Sensing of Images and Video (Foundations and Trends(r) in

Signal Processing). You can include your knowledge by it. Without leaving behind the printed book, it can add your knowledge and make anyone happier to read. It is most important that, you must aware about book. It can bring you from one destination for a other place.
