A map is an imprint, a sign of man in the landscape. An alien intelligence, observing our cities from the great distances of the space, could interpret them as the characters of an alphabet, sort of messages, a code of signs, each one different from the other, each with its own meaning and its own syntax. This hypothetical alien presence may not even realize that these cities have a purpose and a function, which are the product of the way we have adapted to live on this planet, but it could engage in an attempt to interpret this unknown language, identifying the alphabet and associating to each character a precise meaning. We will still be able to understand and share this new meanings, or will they have lost any sense for us. Calvendo calendars are premium products - a bit more pricey than others but with added benefits: Our calendars always look beautiful on your wall because we produce them locally with premium paper and sophisticated spiral binding, ensuring easy turning of pages and flat hanging against the wall. A protective transparent plastic cover sheet provides added stability and each calendar comes in five languages. Treat yourself to a Calvendo calendar and you get something that looks better all year round.
