Investigating Landforms: Earth and Space Science (Science Readers) Lynn Van Gorp

Earth's surface is always changing and scientists study landforms to learn about these changes. Destructive forces like earthquakes and volcanoes are discussed as well as weathering and erosion from water runoffs. Readers will learn about some of the most famous and majestic landforms in existence, like the Canadian Rocky Mountains, Angel Falls, Mount Fuji, and Columbia River Gorge, through stunning images, easy-to-read text, fascinating sidebars, and supporting glossary and index. An engaging lab activity is featured to encourage readers to further explore how landforms occur!

About Shell Education

Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.
