Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics) Grace Y. Yi

This monograph on measurement error and misclassification covers a broad range of problems and emphasizes unique features in modeling and analyzing problems arising from medical research and epidemiological studies. Many measurement error and misclassification problems have been addressed in various fields over the years as well as with a wide spectrum of data, including event history data (such as survival data and recurrent event data), correlated data (such as longitudinal data and clustered data), multi-state event data, and data arising from case-control studies. *Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application* brings together assorted methods in a single text and provides an update of recent developments for a variety of settings. Measurement error effects and strategies of handling mismeasurement for different models are closely examined in combination with applications to specific problems.

Readers with diverse backgrounds and objectives can utilize this text. Familiarity with inference methods?such as likelihood and estimating function theory?or modeling schemes in varying settings?such as survival analysis and longitudinal data analysis?can result in a full appreciation of the material, but it is not essential since each chapter provides basic inference frameworks and background information on an individual topic to ease the access of the material. The text is presented in a coherent and self-contained manner and highlights the essence of commonly used modeling and inference methods.

This text can serve as a reference book for researchers interested in statistical methodology for handling data with measurement error or misclassification; as a textbook for graduate students, especially for those majoring in statistics and biostatistics; or as a book for applied statisticians whose interest focuses on analysis of error-contaminated data.

From reader reviews:

Charles Branch:

Reading a book tends to be new life style in this particular era globalization. With examining you can get a lot of information that will give you benefit in your life. With book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire their very own reader with their story or even their experience. Not only situation that share in the publications. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors these days always try to improve their proficiency in writing, they also doing some research before they write to the book. One of them is this Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics).

Janet Baltimore:

Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics) can be one of your nice books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort that will put every word into joy arrangement in writing Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics) although doesn't forget the main point, giving the reader the hottest as well as based confirm resource info that maybe you can be considered one of it. This great information could drawn you into new stage of crucial contemplating.

Brandy Felts:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you might have it in e-book approach, more simple and reachable. That Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics) can give you a lot of close friends because by you taking a look at this one book you have issue that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This book offer you information that maybe your friend doesn't learn, by knowing more than various other make you to be great folks. So , why hesitate? Let's have Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics).

Blanche Jackson:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is prepared or printed or highlighted from each source in which filled update of news. Within this modern era like now, many ways to get information are available for an individual. From media social including newspaper, magazines, science book, encyclopedia, reference book, book and comic.

You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the Statistical Analysis with Measurement Error or Misclassification: Strategy, Method and Application (Springer Series in Statistics) when you essential it?
