Basic Concepts in Statistics and Epidemiology

Theodore H. MacDonald, Denis Pereira Gray

Basic Concepts in Statistics and Epidemiology Theodore H. MacDonald, Denis Pereira Gray

This book contains a Foreword by Allyson Pollock, Professor and Head, Centre for International Public Health Policy, University of Edinburgh. Healthcare students, practitioners and researchers need a sound basis for making valid statistical inferences from health data. To make the best use of statistical software, it is necessary to understand how probabilistic inference works. This book explains that, along with the various ways statistical data can be described and presented. It is designed to develop insight rather than simply the mechanical skills found in other textbooks. This book is specifically designed to underpin the concepts of statistics and epidemiology. It is practical and easy to use and is ideal for people who can feel uncomfortable with mathematics. 'Excellent. A great primer for all students and research workers engaged in learning how to use statistical ideas in public health. It sets out the core concepts and explains them clearly, using worked examples as illustration. If followed carefully, the engaged reader should be able to use the standard statistical software packages intelligently and sensitively. It will stimulate the public health student, in whatever context, and new researchers, to approach the enterprise with enhanced confidence in interpreting and coherently explaining their findings.' - Allyson Pollock, in the Foreword.

From reader reviews:

Colleen Thompson:

Do you have favorite book? When you have, what is your favorite's book? Reserve is very important thing for us to know everything in the world. Each e-book has different aim or even goal; it means that e-book has different type. Some people sense enjoy to spend their time for you to read a book. They are really reading whatever they acquire because their hobby will be reading a book. Consider the person who don't like reading a book? Sometime, person feel need book if they found difficult problem or exercise. Well, probably you'll have this Basic Concepts in Statistics and Epidemiology.

Jill Goulet:

Do you certainly one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Basic Concepts in Statistics and Epidemiology book is readable simply by you who hate those straight word style. You will find the details here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to give to you. The writer connected with Basic Concepts in Statistics and Epidemiology content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the content but it just different such as it. So , do you even now thinking Basic Concepts in Statistics and Epidemiology is not loveable to be your top list reading book?

Jennifer Shipley:

The actual book Basic Concepts in Statistics and Epidemiology will bring someone to the new experience of reading the book. The author style to elucidate the idea is very unique. In case you try to find new book you just read, this book very suitable to you. The book Basic Concepts in Statistics and Epidemiology is much recommended to you to study. You can also get the e-book through the official web site, so you can quicker to read the book.

Pandora Rice:

As a student exactly feel bored for you to reading. If their teacher questioned them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the educator want, like asked to the library. They go to right now there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Basic Concepts in Statistics and Epidemiology can make you really feel more interested to read.
