Radar Principles Peyton Z. Peebles

A comprehensive introduction to radar principles

This volume fills a need in industry and universities for a comprehensive introductory text on radar principles. Well-organized and pedagogically driven, this book focuses on basic and optimum methods of realizing radar operations, covers modern applications, and provides a detailed, sophisticated mathematical treatment. Author Peyton Z. Peebles, Jr., draws on an extensive review of existing radar literature to present a selection of the most fundamental topics. He clearly explains general principles, such as wave propagation and signal theory, before advancing to more complex topics involving aspects of measurement and tracking. The last chapter provides a self-contained treatment of digital signal processing, which can be explored independently. Ample teaching and self-study help is incorporated throughout, including:

- * Numerous worked-out examples illustrating radar theory
- * Many end-of-chapter problems
- * Hundreds of illustrations, including system block diagrams, demonstrating how radar functions are achieved
- * Appended review material and useful mathematical formulas
- * An extensive bibliography and references.

*An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

Radar Principles is destined to become the standard text on radar for graduate and senior-level courses in electrical engineering departments as well as industrial courses. It is also an excellent reference for engineers who are typically required to learn radar principles on the job, and for anyone working in radar-related industries as well as in aerospace and naval research.

From reader reviews:

Kim Gray:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each guide has different aim or goal; it means that reserve has different type. Some people sense enjoy to spend their time and energy to read a book. They are really reading whatever they acquire because their hobby is reading a book. Consider the person who don't like examining a book? Sometime, man or woman feel need book once they found difficult problem or perhaps exercise. Well, probably you should have this Radar Principles.

Ruth Westlund:

Do you certainly one of people who can't read enjoyable if the sentence chained inside the straightway, hold on guys that aren't like that. This Radar Principles book is readable by you who hate those straight word style. You will find the information here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to offer to you. The writer associated with Radar Principles content conveys thinking easily to understand by most people. The printed and e-book are not different in the written content but it just different available as it. So , do you even now thinking Radar Principles is not loveable to be your top list reading book?

Cathy Lantz:

Information is provisions for those to get better life, information currently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider whenever those information which is from the former life are hard to be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you get the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen within you if you take Radar Principles as your daily resource information.

Delaine Valencia:

Spent a free a chance to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they carrying out activity like watching television, going to beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? May be reading a book might be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to try look for book, may be the book untitled Radar Principles can be fine book to read. May be it may be best activity to you.
