Sudhir R. Ghorpade, Balmohan V. Limaye

A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) Sudhir R. Ghorpade, Balmohan V. Limaye

This self-contained textbook gives a thorough exposition of multivariable calculus. The emphasis is on correlating general concepts and results of multivariable calculus with their counterparts in one-variable calculus. Further, the book includes genuine analogues of basic results in one-variable calculus, such as the mean value theorem and the fundamental theorem of calculus.

This book is distinguished from others on the subject: it examines topics not typically covered, such as monotonicity, bimonotonicity, and convexity, together with their relation to partial differentiation, cubature rules for approximate evaluation of double integrals, and conditional as well as unconditional convergence of double series and improper double integrals. Each chapter contains detailed proofs of relevant results, along with numerous examples and a wide collection of exercises of varying degrees of difficulty, making the book useful to undergraduate and graduate students alike.

From reader reviews:

Julian Eaton:

Book is actually written, printed, or illustrated for everything. You can learn everything you want by a book. Book has a different type. As you may know that book is important issue to bring us around the world. Alongside that you can your reading skill was fluently. A e-book A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) will make you to be smarter. You can feel much more confidence if you can know about almost everything. But some of you think which open or reading a book make you bored. It is far from make you fun. Why they are often thought like that? Have you in search of best book or ideal book with you?

Juanita Stoneman:

Reading a reserve can be one of a lot of pastime that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new info. When you read a publication you will get new information because book is one of many ways to share the information or maybe their idea. Second, examining a book will make an individual more imaginative. When you studying a book especially fictional book the author will bring someone to imagine the story how the personas do it anything. Third, you may share your knowledge to other individuals. When you read this A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics), you can tells your family, friends in addition to soon about yours e-book. Your knowledge can inspire average, make them reading a publication.

Richard Graham:

The e-book untitled A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) is the e-book that recommended to you to see. You can see the quality of the e-book content that will be shown to anyone. The language that publisher use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, to ensure the information that they share to your account is absolutely accurate. You also will get the e-book of A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) from the publisher to make you far more enjoy free time.

Cynthia Harvell:

That reserve can make you to feel relax. This book A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) was vibrant and of course has pictures around. As we know that book A Course in Multivariable Calculus and Analysis (Undergraduate Texts in Mathematics) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading this.
