## Clinical Immunology: Principles and Laboratory Diagnosis

Introducing clinical immunology, this text offers detailed instruction in immunobiology, lab methods and clinical serology, and is divided into three sections, covering the whole scope of clinical immunology. Coverage includes: immune reactions by the human host in response to a challenge; fundamental mechanisms of the immune system; antigens and antibodies and their interaction in serologic testing; the principles of "in vitro" serologic reactions and the sources of error and quality control in testing; and immunologic diseases in which measurement of an immune product or reaction is a significant tool for diagnosing or monitoring the disease. Features new to this edition include: chapter outlines; learning objectives; colour plates; review questions; and case studies. New chapters highlight: nucleic acid probes and blotting techniques; spirochetal infection and serology; *Burkholderia burgdorferi* infections and serology; and transplantations.
