148 pages covering all topics in MCAT organic chemistry, index, color illustrations, four 30-minute MCAT practice exams with answers and explanations (92 questions), 96 additional MCAT practice questions also with answers and explanations, 48 full color flashcards covering nmr and all important reactions. This book covers all the organic chemistry tested by the MCAT. The book is divided into four topics. Each topic has a thirty-minute MCAT practice exam. The exams are MCAT-accurate down to the font. Each exam is accompanied by answers and explanations which include instructions on how to answer specific questions more quickly and accurately. The book is perfect bound, printed on top quality paper in full color, and has a laminated color cover. It is the same book used in the EXAMKRACKERS MCAT preparation course. It is more MCAT-accurate, more thorough, and more conceptual than any other MCAT prep book on the market. Note: This book is short because it is accurate. The most common misconception concerning MCAT content is the depth of organic chemistry tested. It is vital that the test taker know exactly what depth of knowledge is required. Any other MCAT prep books and courses that we have seen, go far beyond what is required by the MCAT in organic chemistry. As a result, students are confounded and confused by orgo on the MCAT; they are easily misled into searching for the difficult solution to the superficial, but well-disguised, question. Like all our other books, this book covers all the organic chemistry tested by the MCAT plus a little extra background knowledge.
