Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) Frederic Magoules, Jie Pan, Fei Teng

As more and more data is generated at a faster-than-ever rate, processing large volumes of data is becoming a challenge for data analysis software. Addressing performance issues, **Cloud Computing: Data-Intensive Computing and Scheduling** explores the evolution of classical techniques and describes completely new methods and innovative algorithms. The book delineates many concepts, models, methods, algorithms, and software used in cloud computing.

After a general introduction to the field, the text covers resource management, including scheduling algorithms for real-time tasks and practical algorithms for user bidding and auctioneer pricing. It next explains approaches to data analytical query processing, including pre-computing, data indexing, and data partitioning. Applications of MapReduce, a new parallel programming model, are then presented. The authors also discuss how to optimize multiple group-by query processing and introduce a MapReduce real-time scheduling algorithm.

A useful reference for studying and using MapReduce and cloud computing platforms, this book presents various technologies that demonstrate how cloud computing can meet business requirements and serve as the infrastructure of multidimensional data analysis applications.

From reader reviews:

Marcia Fullerton:

In this 21st century, people become competitive in each way. By being competitive today, people have do something to make these people survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that often many people have underestimated the item for a while is reading. Sure, by reading a guide your ability to survive raise then having chance to endure than other is high. For you who want to start reading any book, we give you this Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) book as basic and daily reading reserve. Why, because this book is more than just a book.

Ida Vanwormer:

Do you considered one of people who can't read satisfying if the sentence chained within the straightway, hold on guys that aren't like that. This Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) book is readable through you who hate those straight word style. You will find the info here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to give to you. The writer involving Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) content conveys objective easily to understand by many people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) is not loveable to be your top collection reading book?

Lowell Oliver:

Spent a free time to be fun activity to do! A lot of people spent their sparetime with their family, or all their friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book may be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try out look for book, may be the reserve untitled Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) can be great book to read. May be it may be best activity to you.

Ryan Walker:

In this period globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspaper,

book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for your requirements is Cloud Computing: Data-Intensive Computing and Scheduling (Chapman & Hall/CRC Numerical Analysis and Scientific Computing Series) this guide consist a lot of the information of the condition of this world now. This kind of book was represented how do the world has grown up. The dialect styles that writer use to explain it is easy to understand. Often the writer made some analysis when he makes this book. This is why this book ideal all of you.
