Guides Students in Understanding the Interactions between Computing/Networking Technologies and Security Issues

Taking an interactive, "learn-by-doing" approach to teaching, **Introduction to Computer and Network Security: Navigating Shades of Gray** gives you a clear course to teach the technical issues related to security. Unlike most computer security books, which concentrate on software design and implementation, cryptographic tools, or networking issues, this text also explores how the interactions between hardware, software, and users affect system security.

The book presents basic principles and concepts, along with examples of current threats to illustrate how the principles can either enable or neutralize exploits. Students see the importance of these concepts in existing and future technologies. In a challenging yet enjoyable way, they learn about a variety of technical topics, including current security exploits, technical factors that enable attacks, and economic and social factors that determine the security of future systems.

Extensively classroom-tested, the material is structured around a set of challenging projects. Through staging exploits and choosing countermeasures to neutralize the attacks in the projects, students learn:

- How computer systems and networks operate
- How to reverse-engineer processes
- How to use systems in ways that were never foreseen (or supported) by the original developers

Combining hands-on work with technical overviews, this text helps you integrate security analysis into your technical computing curriculum. It will educate your students on security issues, such as side-channel attacks, and deepen their understanding of how computers and networks work.

From reader reviews:

Thomas Welty:

Throughout other case, little folks like to read book Introduction to Computer and Network Security: Navigating Shades of Gray. You can choose the best book if you like reading a book. As long as we know about how is important a book Introduction to Computer and Network Security: Navigating Shades of Gray. You can add understanding and of course you can around the world by a book. Absolutely right, due to the fact from book you can understand everything! From your country until foreign or abroad you will end up known. About simple issue until wonderful thing it is possible to know that. In this era, we are able to open a book or perhaps searching by internet product. It is called e-book. You can utilize it when you feel weary to go to the library. Let's examine.

Ruben Hardy:

What do you in relation to book? It is not important along? Or just adding material when you require something to explain what your own problem? How about your free time? Or are you busy man? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Every individual has many questions above. They should answer that question simply because just their can do this. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this particular Introduction to Computer and Network Security: Navigating Shades of Gray to read.

Kevin Caputo:

That guide can make you to feel relax. This specific book Introduction to Computer and Network Security: Navigating Shades of Gray was vibrant and of course has pictures on the website. As we know that book Introduction to Computer and Network Security: Navigating Shades of Gray has many kinds or type. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.

Donna Davis:

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some reserve, they are complained. Just minor students that has reading's soul or real their interest. They just do what the educator want, like asked to the library. They go to there but nothing reading significantly. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Introduction to Computer and Network Security: Navigating Shades of Gray can make you truly feel more interested to read.
