Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics)

Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics)

These are the proceedings of the conference "Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics" held at the Department of Mathematics, University of Florida, Gainesville, from November 11 to 13, 1999. The main emphasis of the conference was Computer Algebra (i. e. symbolic computation) and how it related to the fields of Number Theory, Special Functions, Physics and Combinatorics. A subject that is common to all of these fields is q-series. We brought together those who do symbolic computation with q-series and those who need q-series including workers in Physics and Combinatorics. The goal of the conference was to inform mathematicians and physicists who use q-series of the latest developments in the field of q-series and especially how symbolic computation has aided these developments. Over 60 people were invited to participate in the conference. We ended up having 45 participants at the conference, including six one hour plenary speakers and 28 half hour speakers. There were talks in all the areas we were hoping for. There were three software demonstrations.

From reader reviews:

Jodi Saldana:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each guide has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time for you to read a book. They are really reading whatever they have because their hobby is reading a book. Think about the person who don't like studying a book? Sometime, man or woman feel need book once they found difficult problem or even exercise. Well, probably you will need this Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics).

William Reeves:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the actual Mall. How about open as well as read a book called Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics)? Maybe it is to become best activity for you. You understand beside you can spend your time using your favorite's book, you can better than before. Do you agree with it has the opinion or you have additional opinion?

Eleanor Rowe:

Information is provisions for people to get better life, information currently can get by anyone with everywhere. The information can be a information or any news even a problem. What people must be consider any time those information which is from the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you get the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics) as your daily resource information.

Linda Porter:

A number of people said that they feel uninterested when they reading a reserve. They are directly felt it when they get a half areas of the book. You can choose the book Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in Mathematics) to make your personal reading is interesting. Your own skill of reading talent is developing when you just like reading. Try to choose basic book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be very first opinion for you to like to wide open a book and go through it. Beside that the e-book Symbolic Computation, Number Theory, Special Functions, Physics and Combinatorics (Developments in

Mathematics) can to be your new friend when you're truly feel alone and confuse using what must you're doing of this time.
