A Bridge to Higher Mathematics (Textbooks in Mathematics)

Valentin Deaconu, Donald C. Pfaff

A Bridge to Higher Mathematics (Textbooks in Mathematics) Valentin Deaconu, Donald C. Pfaff

A Bridge to Higher Mathematics is more than simply another book to aid the transition to advanced mathematics. The authors intend to assist students in developing a deeper understanding of mathematics and mathematical thought.

The only way to understand mathematics is by doing mathematics. The reader will learn the language of axioms and theorems and will write convincing and cogent proofs using quantifiers. Students will solve many puzzles and encounter some mysteries and challenging problems.

The emphasis is on proof. To progress towards mathematical maturity, it is necessary to be trained in two aspects: the ability to read and understand a proof and the ability to write a proof.

The journey begins with elements of logic and techniques of proof, then with elementary set theory, relations and functions. Peano axioms for positive integers and for natural numbers follow, in particular mathematical and other forms of induction. Next is the construction of integers including some elementary number theory. The notions of finite and infinite sets, cardinality of counting techniques and combinatorics illustrate more techniques of proof.

For more advanced readers, the text concludes with sets of rational numbers, the set of reals and the set of complex numbers. Topics, like Zorn's lemma and the axiom of choice are included. More challenging problems are marked with a star.

All these materials are optional, depending on the instructor and the goals of the course.

From reader reviews:

Joel Fallis:

The feeling that you get from A Bridge to Higher Mathematics (Textbooks in Mathematics) is a more deep you rooting the information that hide within the words the more you get interested in reading it. It doesn't mean that this book is hard to understand but A Bridge to Higher Mathematics (Textbooks in Mathematics) giving you buzz feeling of reading. The article author conveys their point in certain way that can be understood simply by anyone who read this because the author of this book is well-known enough. This particular book also makes your personal vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We propose you for having this kind of A Bridge to Higher Mathematics (Textbooks in Mathematics) instantly.

Michael Yancey:

Within this era which is the greater particular person or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time very little but quite enough to experience a look at some books. One of the books in the top record in your reading list will be A Bridge to Higher Mathematics (Textbooks in Mathematics). This book that is qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking upwards and review this guide you can get many advantages.

Allen Lutz:

As we know that book is very important thing to add our know-how for everything. By a publication we can know everything we wish. A book is a group of written, printed, illustrated as well as blank sheet. Every year had been exactly added. This reserve A Bridge to Higher Mathematics (Textbooks in Mathematics) was filled with regards to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading any book. If you know how big selling point of a book, you can truly feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you wanted.

Mary Brott:

That book can make you to feel relax. This specific book A Bridge to Higher Mathematics (Textbooks in Mathematics) was bright colored and of course has pictures on there. As we know that book A Bridge to Higher Mathematics (Textbooks in Mathematics) has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book in your case and try to like reading this.
