If you think luck is random, THINK AGAIN! Human beings possess a subtle energy field that envelops the physical body. When activated, it is capable of manufacturing luck and producing remarkably accurate powers of intuition and foresight. Beneath the deceptive fabric of everyday reality, energy fields continually wage wars to determine who "gets lucky." Those that possess naturally gifted energy fields (such as world class poker players Phil Ivey and Daniel Negreanu) cannot be defeated with skill alone. So the question becomes, "How can YOU develop and use this psychic energy?" THE PSYCHIC GAMBLING SUPERSYSTEM provides the answers. Author Sunil Padiyar offers an engaging study of both the scientific and spiritual aspects of luck, intuition and foresight, all while taking the reader on a riveting journey from the modern theories of Quantum Physics ("God does not play dice!" said Albert Einstein, only to realize later that he was wrong) to the metaphysical theories in the ancient scriptures of the Hindu Upanishads (written as far back as in the first millennium BC). The author recounts authentic stories to describe his own mystic beginnings in a strange and remarkable land, and reveals the intriguing experiences that led to his personal discovery of the principles on which the book is based. He then presents his three-part Supersystem, designed not only to allow you to win more often in games of chance, but to improve your psychic abilities in all aspects of life. Each component of the Supersystem is explained with step-by-step instructions, illustrations, and examples. The final four chapters of the book focus on practical application, and give you the specific techniques you need to harness your psychic powers for winning at poker, blackjack, slots, craps, keno, lottery, horse racing, and other games of chance.
